

Spot the Difference

Mobile VS Traditional

Comparing/contrasting the steps in detecting credibility clues on a mobile device vs a laptop or desktop.

SOURCE	CREDIBILITY MARKERS	WEB	MOBILE	REFLECTION
<p>Students cite the story headline and source of information retrieved from a traditional device, such as a laptop or desktop</p>	<p>Students list clues to credibility. (You may provide these). Some examples include:</p> <ul style="list-style-type: none">• Date content was created (which may be different from the dates it was shared).• Author/Creator (which may be different from the source who posted/shared it).• Affiliations of source.• Presence of emotional triggers throughout content.	<p>Here students trace the path through which they located the credibility clues while accessing the story on the web, listing specifically what they click on to determine when a story was published, etc.</p>	<p>Here students go through the same process as in the previous column, but when using a mobile device. Optional: have students highlight differences.</p>	<p>Here students reflect on which version of the story they found easier to dissect for credibility.</p>
<p>Students cite the story headline and source of information retrieved from a mobile device. Be sure students also share the app being used.</p>
